EXPERIENCE

CENTRE FOR UNIVERSITY RESEARCH AND INNOVATION — Universidad de Zamboanga

Full-Stack Web Developer (React + Node.js + Supabase) — Mar 2025 – Jan 2026

- Developed research panel management modules with appearance tracking, reporting, and automated fee calculation.
- Implemented a multi-stage approval workflow for defense requests, enabling role-based review, status tracking, and approval routing across academic stakeholders.
- Conducted software usability testing for a web-based research management system to report bugs or defects to improve research workflows for program chairs, deans, research associates, and faculty members on the University.
- Architect a role-based access control (RBAC), relational database schemas, Supabase RLS policies, automated fee computation, and research workflow automation

EDUCATIONAL TECHNOLOGY — Universidad de Zamboanga

Digital Learning & Designer Intern — Mar 2026 – June 2026

- Designed digital learning materials, promotional graphics, and educational content for WikiPedia CLub.
- Assisted in managing and supporting website Student Portal, including account creation, activation, password resets, and profiling.
- Earned certifications on hands on training and webinar about Web Development, Artificial Intelligence, Prompt Engineering Networking, Cybersecurity, and Digital Technologies.

CLIENT — Zamboanga City

Software Tester /QA - Freelance — Aug 2026 – Aug 2026

- Executed comprehensive QA test cases across core HRIS and Payroll modules, covering System Administration, User Management, RBAC, Audit Logs, and Security & Compliance workflows.
- Maintained structured QA documentation and Excel test matrices to ensure complete module coverage.
- Found and reported app bugs with clear steps, screenshots, and details so developers could easily fix them.

PROJECTS

GTRADES - TRADING JOURNAL (Website) — 2024 - Present

- Built a responsive trading journal using Next.js, React, and TypeScript to track trades, strategies, risk, and profit and loss (P&L).
- Created dashboard views for account balance, win rate, risk-to-reward ratio, trade outcomes, and equity curve.
- Added searchable trade history, strategy summaries, trade entry forms, and CSV export.

STUDCHECK (Mobile App) — July 2026

- Implemented features for answer sheet scanning, automatic score calculation and student performance reporting
- Developed a mobile application that automates multiple-choice test checking using Optical Mark Recognition (OMR), reducing manual grading time and improving accuracy.

EDUCATION

UNIVERSIDAD DE ZAMBOANGA — Zamboanga City

BS Information Technology — June 2022 -Aug 2026

Relevant Coursework: Web Development, Mobile Development, Database Systems, Artificial Intelligence, Networking, Cyber security.
Officer (Auditor/Treasurer)

SKILLS

Technical Skills: Proficient in HTML/CSS, JavaScript/TypeScript, React, Node.js, MySQL, Supabase; Familiar with PHP (Laravel), Python, flutter (dart), Docker, REST APIs, git & github , mongodb atlas and firebase
AI Tools : Cursor, Cluade Code , Codex chatgpt , Antigravity , Gemini , deepseek , Prompt engineering
Certifications: FreeCodeCamp – Web Development, Cisco - Cyber security, DICT – Netwoking , English - Basic
